

MAATO TPIMS Project

Finding safe, available truck parking will soon be easier.

TPIMS makes your job easier.

Safe, convenient parking is essential for long-haul truck drivers, the lifeblood of freight transportation. Yet they often struggle for up to an hour each day to find areas to safely rest.

Eight states – *Indiana, Iowa, Kansas, Kentucky, Michigan, Minnesota, Ohio and Wisconsin* – have joined together to create **TPIMS** – a new Truck Parking Information Management System – to help truck drivers travel across the Midwest more safely and efficiently.

Real-time parking info when you need it.

TPIMS is a first-of-its-kind regional system for providing real-time parking availability information to truck drivers through dynamic message signs, smartphone applications, in-cab technology and traveler information websites. It will cover Midwestern segments along the states' major freight corridors.

BENEFITS FOR TRUCK DRIVERS, MOTORISTS AND THE ECONOMY:

Increased safety

More efficient movement of goods

Fewer non-routine maintenance repairs on shoulders and ramps

Reduced fuel consumption and emissions

Projected \$430 million in benefits annually

LAUNCH DATE: JANUARY 2019
